RESEARCH EXPERIENCE	**CSIR - Central Electronics Engineering Research Institute, Pilani**	
	Mentor: Dr. Santanu Chaudhury (Director, IIT Jodhpur)	July 2018 - Dec 2018

Explored the immense potential of Generative Adversarial Networks (GANs) to generate 31 band hyperspectral images from RGB images employing the idea of neural oscillations to train GANs.

Samsung R&D Institute, Noida

Mentors: Mr. Chetan Chauhan, Mr. Ashish Thakur   Summer 2017

Proposed a Convolutional Encoder Decoder Network for End to End Image Generation using Tensorflow. The architecture was trained to detect blurred region of images in a pixel-by-pixel manner without any external estimation techniques.

CSIR - Central Electronics Engineering Research Institute, Pilani

Mentor: Dr. J. L. Raheja (Chief Scientist, Machine Vision Lab)   Jun 2015 - Feb 2016

Using an input depth map data streams from a kinect sensor, a skeleton-tracking algorithm was applied for fall detection. The relative normalized positions of joints was achieved using a torso-centered coordinate system.
